FleetLytics Leadership

LISA PAUL, CPCU
Executive Vice President
Nashville, TN
Experience: 30+ Years

With over three decades of experience in transportation insurance and risk management, Lisa develops direct retail and specialty programs for the transportation industry, structuring insurance placements and programs that advance companies' growth strategies and reduce total cost of risk per mile.

She is experienced in underwriting property, warehouse legal liability, domestic and international transportation surety, auto liability, general liability, cargo, excess towers, contingent liability and workers' compensation coverages.

Lisa additionally has developed contract review AI tools between shippers, freight brokers and contract carriers, and handled SaaS management for transportation companies, including onboarding, compliance and embedded insurance products for transportation companies and their owner operators, contract carriers and agents.

Alliant Insurance Services | Proprietary & Confidential

ROGER FLORES
Chief Underwriting Officer
New York, NY
Experience: 20+ Years

Roger Flores is Chief Underwriting Officer, Alliant Transportation, responsible for overseeing all auto underwriting functions for the firm's transportation specialty vertical.

Roger has more than 20 years of insurance experience. Prior to joining Alliant, he served as Senior Vice President of Commercial Auto Underwriting at Roosevelt Road Specialty. In this role, he developed the Auto division from the ground up.

Roger also served as Vice President of Underwriting and Operations at American Millennium Insurance Company, a wheels-based carrier, where he oversaw all underwriting operations and handled business operations, including information technology, real estate and reinsurance. Roger has a diverse background within the insurance field, including nine years of claims experience. This background gives Roger a unique perspective, allowing him to be proactive in underwriting and anticipating potential pitfalls.

JEFF HUNT
Senior Vice President
Indianapolis, Indiana
Experience: 20+ Years

As Senior Vice President, Senior Claims Consultant, Alliant Transportation, Jeff Hunt leverages his expertise across risk management and claims to develop innovative solutions for clients in the commercial and transportation sectors. With over 20 years of experience in property and casualty insurance and litigating as a practicing attorney, Jeff specializes in transportation areas including contract review, master service agreements, shipping contracts for land and marine, and final mile.

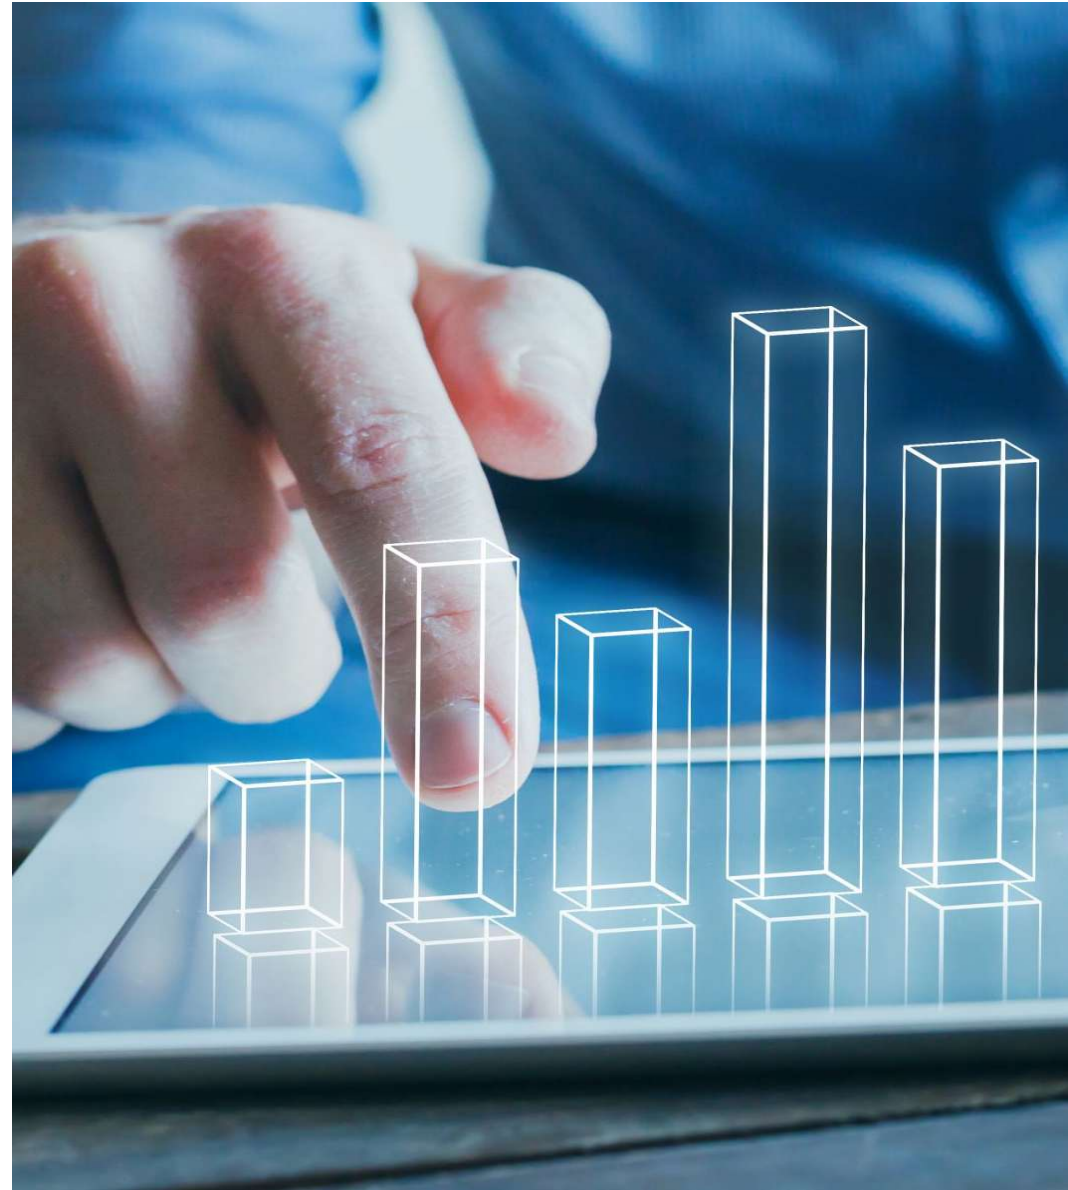

Jeff has managed multiple aspects of retail and program insurance offerings, including fleet, independent contractors, courier, final mile, and moving and storage. He is experienced in multiple lines of insurance, including commercial auto, general liability, EPLI, cargo, workers' compensation, occupational accident and cyber. Drawing from his industry-leading expertise, Jeff helps clients optimize their operations by navigating them through claims, customer relations and advocacy, risk management and regulatory issues.

FleetLytics Vision & Business Objectives

- Single, centralized transportation risk and operations platform
- Reduces Total Cost of Risk to Leverage already invested technology
- Role and data security to aggregator to contract with third party haulers
- Integrate telematics, compliance, claims, and insurance workflows
- Reduces gaps that delay insurance binding at the contract hauler level
- Integrates solutions for the contract hauler for their business

Alliant Insurance Services | Proprietary & Confidential

FleetLytics is a comprehensive SaaS platform that delivers value across the risk management value chain

Ease of Use

API enabled technology that consolidates safety, compliance and claims data into one system

Oversight

Centralized dashboard that gives clients a clear view of fleet activity in real-time

Compliance

Track expiration of regulatory filings, insurance and other contractual requirements

Telematics and Dash Cameras

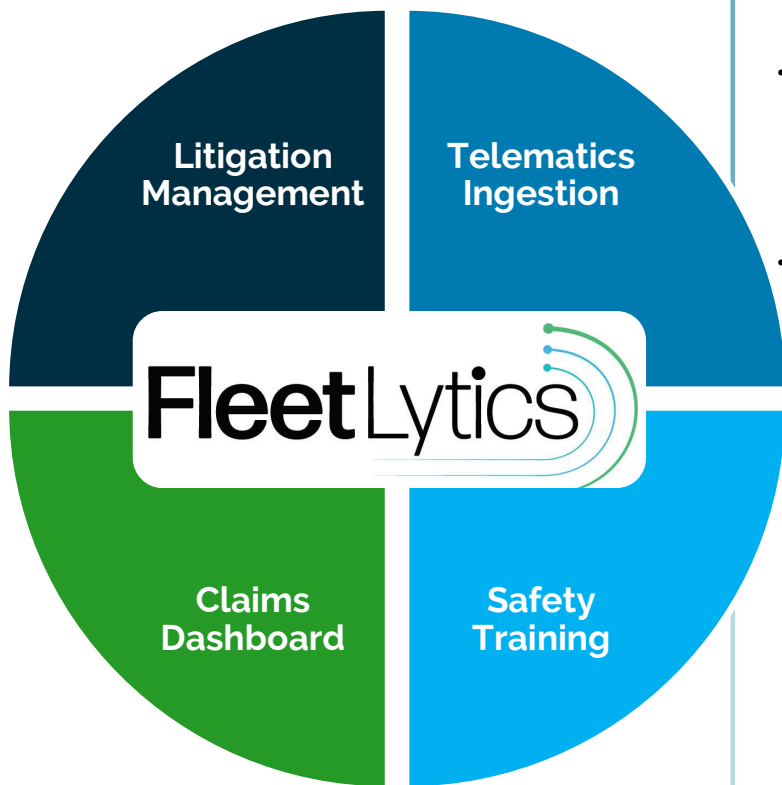

Integrate telematics, receive instant driver and vehicle data to improve route optimization, driver training, first notice of loss and claims

Risk Management and Training

Meet OSHA requirements, conduct driver training, regulatory compliance and remediation from telematics and claims cause of loss

Claims Data and Advocacy

First Notice of Loss, Claims Dashboard and Claims Advocacy. Feedback on claims level data for benchmarking and risk management

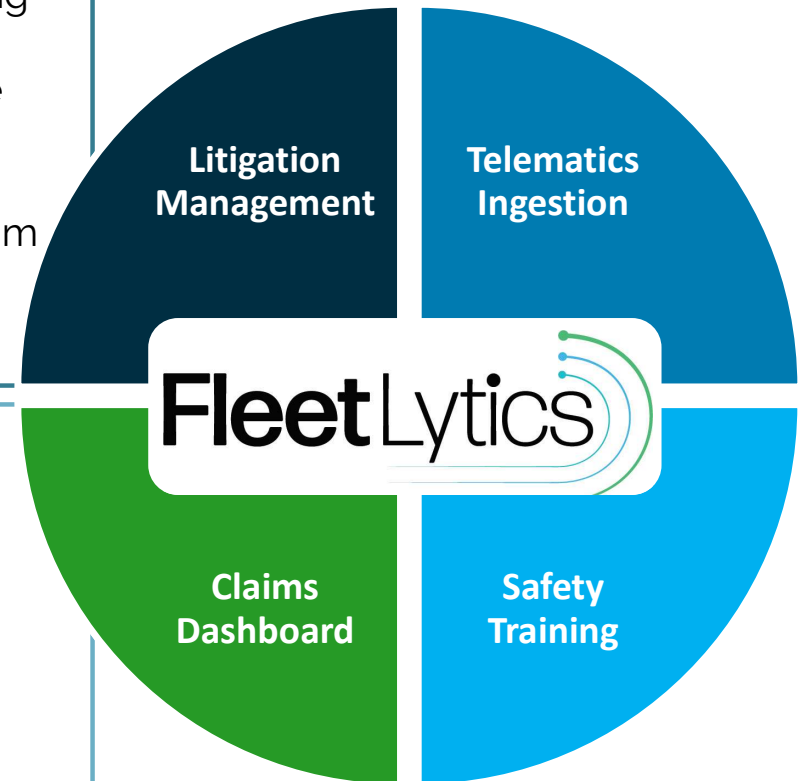

- **API Connectivity:** Hardware-agnostic SaaS platform works to ingest data seamlessly from most telematics, camera or in-vehicle, technology providers.
- **Trusted Intermediary:** An independent layer between telematics data and the insurance market, allowing for review, analysis and thoughtful communication of improvements in safety.
- **Operational Insights:** Use loss data in operational decision making such as routing, contract pricing and driver assignment.

- **Training & Gamification:** Assign targeted modules based on driver behavior and vehicle type, supporting long-term driver development.
- **Driver Coaching:** Provide real-time corrective feedback for repeat violations or escalate for HR action.
- **Data Analytics:** Overlays telematics, performance and claims data to provide actionable insights in safety.

- ▶ **Claims Management:** Track claim events, automate reporting and conduct trend analysis by claim types.
- ▶ **Improve Efficiency:** Automatically identify property damage and small bodily injury claims and flag for payment, to avoid escalation.
- ▶ **Claim Adjudication:** Telematics ingestion enables faster claim response and appropriate triage for serious claim events.

- ▶ **Centralized Dashboard:** Consolidate revenue, mileage, safety and claims data into a single, accessible, dashboard.
- ▶ **Collision Detection:** Event triggered First Notice of Loss (FNOL), with ability to decide reporting to insurance carrier, Alliant or internal teams.
- ▶ **Claim Reduction:** Achieve measurable reductions in accidents, reducing operational disruption and vehicle downtime.

Universal Fleet Analytics Software in a Single Source

MVR Support for AAA hauler

MVR Ordering

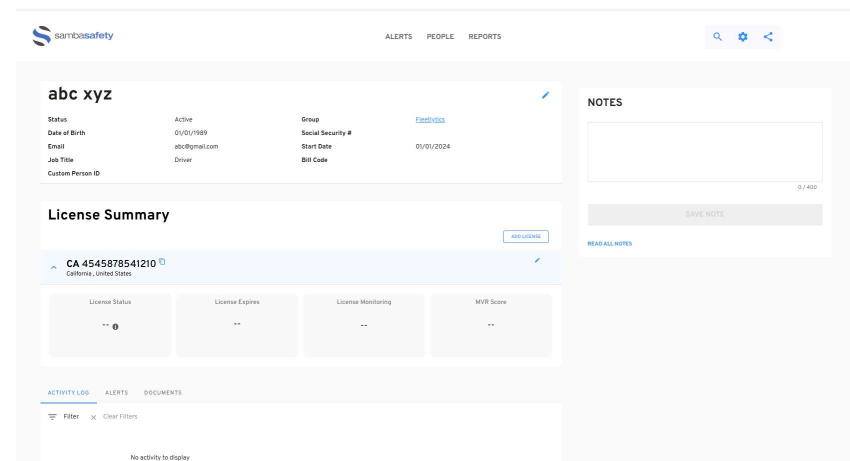

Order MVR from State Authority(s) for commercial driver's license status, violation confirmation and overall driving history record for eligibility verification. Make sure your drivers are properly credentialed during onboarding and use ongoing ordering to maintain fleet compliance.

MVR Monitoring

Stay on top of drivers' license status and updated driving records through continuous monitoring to confirm driver eligibility and maintain a compliant fleet. Help avoid violations and out of service inspection results based upon invalid CDL status.

Telematics Risk and Insurance Integration for the AAA hauler

FleetLytics has the power to transform your fleet analytics into fewer claims, broader protection and lower costs. Right-size your premium and coverage limits based on real-time mileage, scores, driver behavior and forward-looking risk evaluations.

Smarter data. Safer drivers. Better insurability

Alliant Insurance Services | Proprietary & Confidential

FleetLytics Universal Analytics Dashboard

FleetLytics is compatible with most fleet telematics, camera and in-vehicle technology providers. The centralized dashboard consolidates safety, compliance, and telematics and claims data to provide a clear, real-time view of fleet activity.

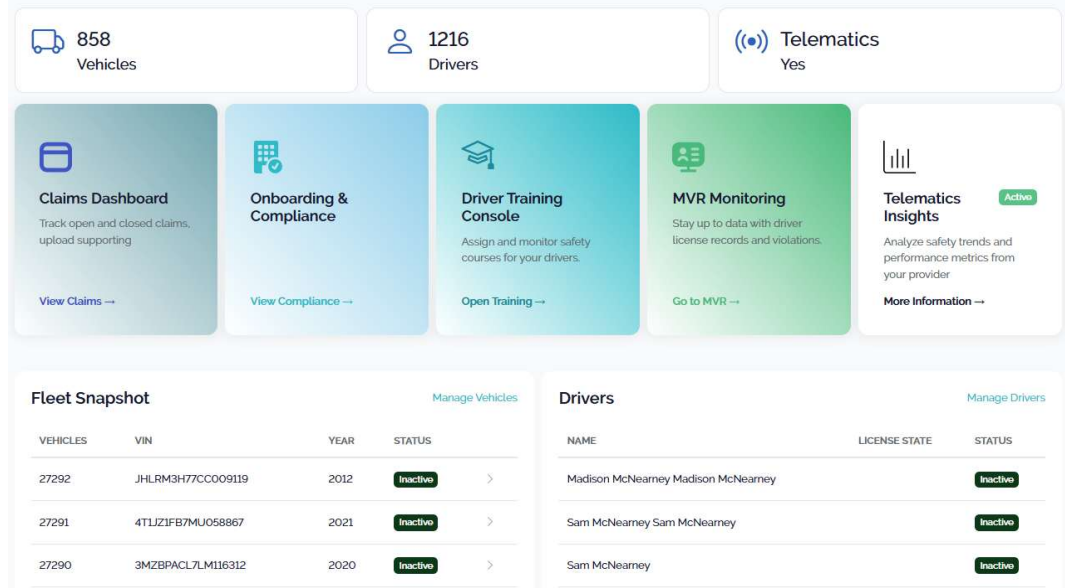

Key capabilities include collision detection and live alerts, instant claims reporting and tracking, automated driver onboarding and compliance, targeted training based on driver behavior, real-time corrective driver feedback and performance data integration with insurers.

Alliant Insurance Services | Proprietary & Confidential

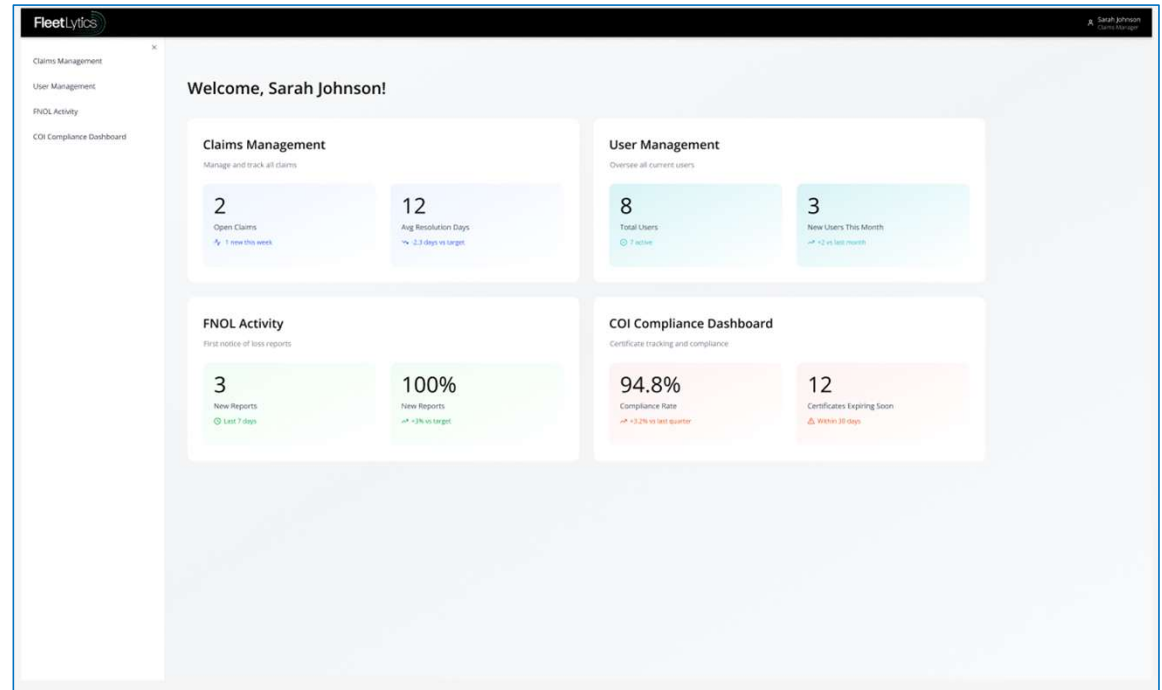

Welcome back, Paramita Roy!

Here's your fleet overview and service insights at a glance.

Claims and Compliance Enterprise Level Dashboard

Our analytics software transforms fleet telematics and claims data into actionable insights, enhancing information availability, improving safety oversight and outcomes, and reducing your total cost of risk. That means: better coverage, lower premiums, and measurable ROI for fleets of every shape and size.

Collision Detection to FNOL

FleetLytics applies telematics to obtain live alerts and collision detection to First Notice of Loss generation capabilities to get an early start on incident response and remediation. Increase visibility and exoneration rates for accidents to protect company and drivers. Capture driver behavior and loss and claims data to drive internal operational and safety decisions, reduce the frequency and severity of accidents and avoid litigation. FleetLytics helps to improve the sustainability and profitability of your business.
